

We Invented the World's Greatest Snow and Ice Melter Because We Had To.

Pioneers in the Science of Snow and Ice-Melting

When you experience over 700 inches of snow every year, you're familiar with snow and ice issues. And when you live in the heart of the Rockies, you're probably sensitive to environmental concerns too. That's why customers have relied on us for over 50 years to develop formulas that work faster, longer and safer. Because protecting our clients' assets is as important as melting the snow and ice.

Liquid Premiere Ice Melter® the safest, Most Powerful De-Icer

Specially formulated non-chloride based ingredients in Liquid Premiere Ice Melter® act effectively to prevent snow and ice from forming on surfaces even under the most extreme conditions. This lab based deicer is safer for workers and the environment than conventional chloride based deicers. Liquid Premiere Ice Melter® is safer to use on all surfaces including the most sensitive alloys.

- Effective to -8° F (-22° C)
- Non-corrosive to metal and concrete
- Safer for people, animals and vegetation*
- More slip resistant than pellet ice melters on stairwells
- Will not stain carpets or floors
- NSF certified

Suggested Uses for Liquid Premiere Ice Melter®

- Stairwells to avoid slipping hazards
- Parking structures where chloride-containing ice melters may cause corrosive damage
- Sidewalks and entryways before a storm to prevent ice from forming and to ease snow removal
- Following ice storms to de-ice by breaking the bond ice forms with concrete
- Pre-wetting road salt to increase performance at low temperatures

*When used as directed.

Ensure your driveways, sidewalks and parking structures are safe and secure.
